COOLING SYSTEM

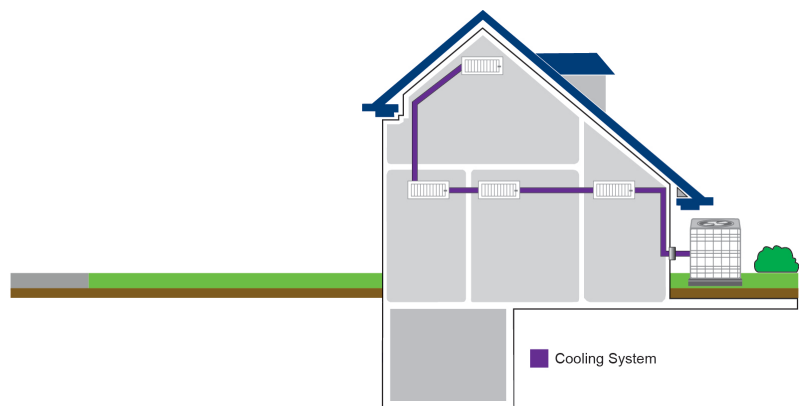

Air conditioning is critical to keep a home comfortable and free of humidity. There are electrical components in an A/C system that can break down from the stress of heat, including the circuit board, condenser motor/fan and more. Homeowners are responsible for the repair and maintenance of all central air conditioning parts. Over 300,000 US homeowners have heating and cooling system coverage, which has saved policyholders over \$22.2 million in repair expenses over the last three years.

PRODUCT FEATURES

- Covers emergency breakdown repair of your home cooling system including repair or replacement of capacitor, circuit boards, internal fuses or breakers, condensate pumps, condenser motor/fan, contactor switches, delay timer, fan controls and relays, filter drier, high and low pressure switches, limit controls, refrigerant (excluding maintenance recharges), relays, transformers and valves
- High-quality repairs that comply with the most current rules and regulations, including specifications for materials

DIFFERENTIATORS

- Never any deductibles, call-out fees or pre-inspections required
- 24/7/365 live operators for claims and fast call-back and dispatch time – contractor will be on site within 3 hours for emergencies
- One-year guarantee on all covered repairs

*Coverage can be customized according to Partner requirements and specifications.
