HEATING SYSTEM

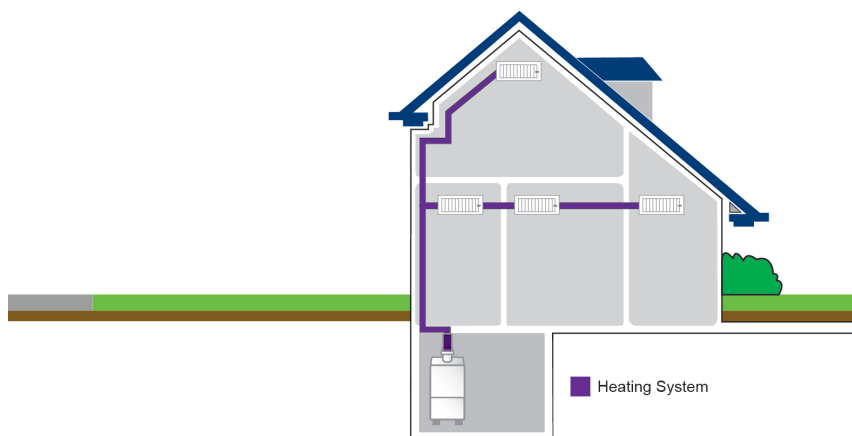

An unexpected heating system failure can result in insufficient or no heat which can be unsafe and can lead to frozen pipes and water damage. Homeowners are responsible for the repair and maintenance of all the complicated parts that keep a boiler/furnace functioning and finding a qualified technician can be difficult, especially in an emergency. Over 300,000 US homeowners have heating and cooling system coverage, which has saved policyholders over \$22.2 million in repair expenses over the last three years.

## PRODUCT FEATURES

- Covers emergency breakdown repair of your home heating system including repair or replacement of air scoops and aquastat, barometric damper, blower motors and assembly, belts and pulleys, circuit boards and circulators, ECO safeties, fan and limit controls, fusible links and gas valves, induced draft motor and blower, low water cutoff, main and pilot burners, pilots, thermocouples and pressure switch, regulator valves and relays, spill switches and transformers
- High-quality repairs that comply with the most current rules and regulations, including specifications for materials

## DIFFERENTIATORS

- Never any deductibles, call-out fees or pre-inspections required
- 24/7/365 live operators for claims and fast call-back and dispatch time – contractor will be on site within 3 hours for emergencies
- One-year guarantee on all covered repairs

\*Coverage can be customized according to Partner requirements and specifications.
